

You will need:

Google Chrome

No one likes to install unnecessary software on their computer, which is why we kept our platform as light as possible. The only requirement is that you use [Google Chrome](#), on which you will be able to run our screen sharing extension.

You must use a recent version to avoid any possible issues, so make sure to update!

A steady internet connection

We require a steady internet connection with a minimum upload speed of 1 MB/sec.

A web camera

We need to record you taking the exam so a front facing web camera is required. The web camera should capture your face and upper body while taking the exam, and record audio too.
